BASSANO DEL GRAPPA (18 Km from Asolo)

The enchanting geographical position surrounded by hills and favored by a mild climate, allows the traveler to immerse himself in the enchantment of this medieval town situated in the Vicenza area.

The architectural context of Bassano del Grappa is a plunge into art: the streets of the center are adorned by the works of authors such as Palladio, Canova, Jacopo Da Ponte, Marinali and Dall'Acqua. In Bassano there is the oldest **CIVIC MUSEUM** in the Veneto region which is worth a visit.

LOGGIA DEI PODESTÀ since the fifteenth century has performed important functions of interest to citizens, from the site of registration and conservation of notarial deeds, to the administration of justice and power. HOURS: 9:00 am - 7:00 pm closed Tuesday.

But the symbolic monument of the city is the **PONTE VECCHIO**, built on the project of the PALLADIO that links its image to the epic of the Alpini of the Great War. Over the centuries, due to sudden floods, it has been repeatedly rebuilt respecting the original Palladian design each time. At a mouth of the bridge is the small but fascinating Museo degli Alpini which houses historical documents and vintage memorabilia. On one of the banks of the Ponte Vecchio is the famous where you can taste the typical GRAPPA NARDINI distillate. If you are interested in the history and production of grappa we recommend the **MUSEO DELLA GRAPPA POLI** which is located near the old bridge in the historic center. HOURS: Open every day 09:00 - 19:30
